ARM University Program and Switch Science are hosting a One-Day workshop for training professors and students on how to design and implement SoCs using the ARM Cortex-M0 Design Start softcore processor. The workshop focuses on how to program the low power ARM Cortex-M0 processor using ARM KEIL MDK software tool.

The Cortex-M0+ processor is an entry-level 32-bit ARM Cortex processor designed for a broad range of embedded applications. It offers significant benefits to developers, including:

- A simple architecture that is easy to learn and program.
- Ultra-low power, energy-efficient operation.
- Excellent code density.
