This book is actually an anthology of 5 separate books that make up "The Conqueror Series" -- a set of novels following the rise of Genghis Khan. In total, it comes to around 2,100 pages and is easily the longest book I've ever read. Most people who are saner than I will probably want to read the individual books at their own leisure!

The Domesday Book was commissioned in December 1085 by William the Conqueror, who invaded England in 1066. The first draft was completed in August 1086 and contained records for 13,418 settlements in the English counties south of the rivers Ribble and Tees (the border with Scotland at the time). The original Domesday Book has survived over 900 years of English history and is currently housed in a specially made chest at The National Archives in Kew, London.
