crankshaft, opens and closes the intake and exhaust valves at exactly the right time. Camshafts have raised sections that are called camshaft lobes.

~~How to Fix Automotive Engine problems - YouFixCars.com~~

If the engine is emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded. Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the following for cleaning/replacing your Carburetor.

~~3 Ways to Fix an Engine Misfire~~ wikiHow

By far, the best way to reset the check engine light is to fix the problem that the ECM is reporting. Once the ECM sees that the problem is no longer occurring, such as a cylinder misfire or loose gas cap, it will clear the DTC and turn off the check engine light on its own. The only problem with this method is that it's a waiting game.
